?

CB - PWDC

Crescent Bearers (CB), Lagos, a social movement founded in 1939 with the primary objective to promote community centered educational, religious and socio-cultural activities.

PWDC was commissioned by CB in 2019 to design and build a mosque in Abijo.

Due to budget constraints, the Client requested for design alterations to scale down the building.

In a bid to deliver the original project scope, we decided to step in by contributing supplementary resources (material + time).

PWDC - Craftsmen

PWDC had to develop innovative & cost-saving construction techniques to deliver within budget.

Capacity-building & skills-transfer initiatives were undertaken to improve craftsmanship quality delivery.

New value chains were created

PWDC - Charity Donors

"Assalam alaykum waramatullah wabarakatu Brothers and Sisters.

Alhamdulillah Robbil Alamein, we are nearing the completion of a Masjid in Abijo GRA, Ibeju Lekki Local Government Area, Lagos State.

Way back in 2013, we were approached by our client to help design a Masjid to be donated to the community. After several revisions to the very first concept, construction work commenced in August of 2019.

We took on the masjid project because we wanted to give back to Allah and the Muslim Ummah.

When construction work commenced on site, the design and scope was revised by us, at our own expense because we considered it more beneficial that we maximise the opportunity by creating an additional mezzanine floor for women worshippers. (The original concept was meant to have the women on the same floor with the men).

We are almost done with the construction and we will love for you to also be part of this opportunity to donate in the way of Allah - Fisabillillah (For the sake of Allah)

May Allah enrich the pocket that your contribution will come from. Nothing is too small.

If you would like to contribute towards this mosque development, please make a donation to the following bank account: Zenith Bank Ac No: 1000819191

JazakumAllahu Khariem."

Takeaways

Equitable track record

Leveraging on relationships

*Alignment of common
interests*

Personal motivation

Conclusion

Other projects that have shared these same principles, have lead to creative, effective and fruitful collaborations

THANK YOU
