About me

Industry Pain Points

The BIM Advantage

New terminologies - AR, VR, MR

Construction Visualization

Adoption - How to Start?

What to expect in this Session

- Thought provoking points
- Not a software workshop
- Benefits in clear words
- Resources for tech adoption

Hassan Anifowose

Architect/Co-Founder at **Chronos Studeos**

BIM/VR Specialist at **SwiftWall**

www.chronos-studeos.com

Researching BIM + VR Game Design for Human Building Interaction

The Construction industry is among the least digitized.. But why????

Building

i

Modeling

There is so much more to BIM = **Information..!**

Many are not
using the
DATA in BIM.
Why not?

File Format issues?

I don't know it exists?

Too busy with deadlines?

Data First - what and how?

The Benefits for You

Why embrace Building Information Modeling?

- Resolve differences between multiple consultants models
- Share 'information' efficiently
- Reduce rework & improve communication

Get used to **new terminologies**
because they are not going away..!!

Augmented Virtual & Mixed Reality, Artificial
Intelligence, Machine Learning, Simulation,
Automation, 4D Construction Visualization, 5D Cost
Estimation & Collaboration, Cloud Filesharing

3 Ideas Disrupting Construction

What happens in Advanced Construction Visualization? Not your Everyday 3D...

Clash Detection

Sequencing & Estimation

Predictions & Decisions

Credits - DPR Construction

Autodesk Navisworks

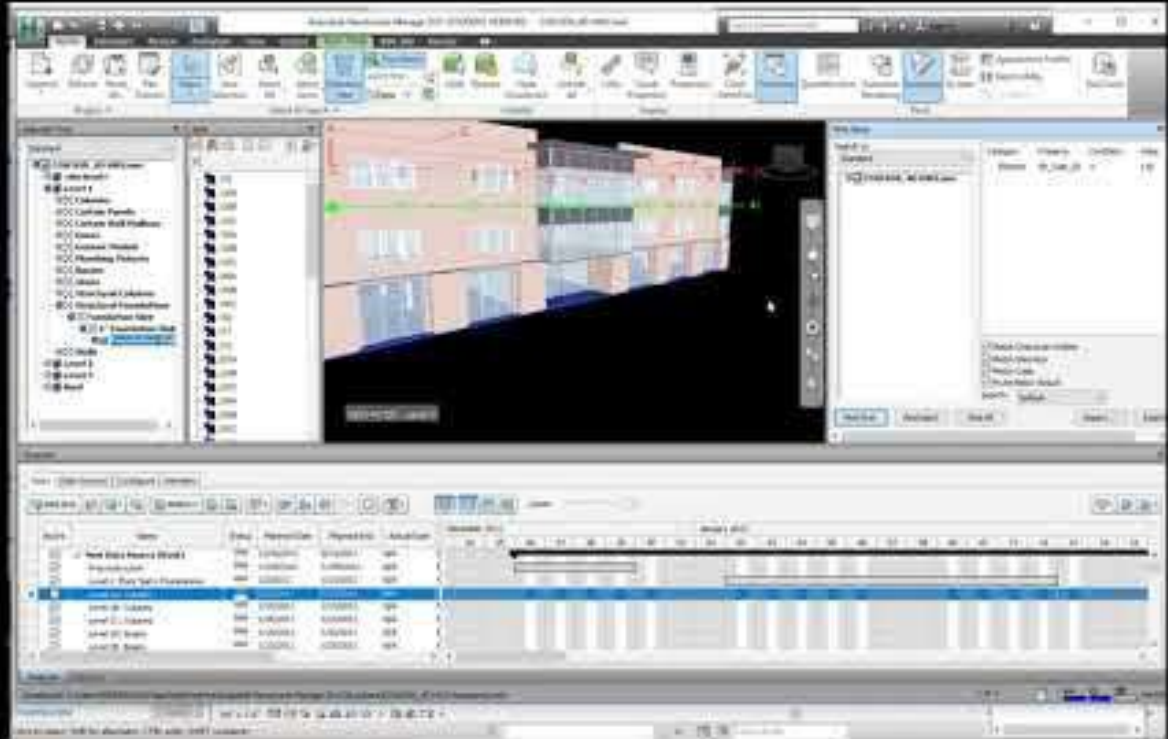

Easy tool in the industry for creating construction scheduling visualization, cost estimation, clash (detection, assignment, report) etc.

Key Benefits

Visually communicate scheduling with contractors/subcontractors/clients during planning sessions and generally achieve a more realistic construction schedule.

Features

- Not hardware/resource intensive
- Has cloud rendering feature
- Update revit models with ease

<https://bit.ly/3hBtPTh>

The Goals!!!

Why embrace Design & Construction Technology?

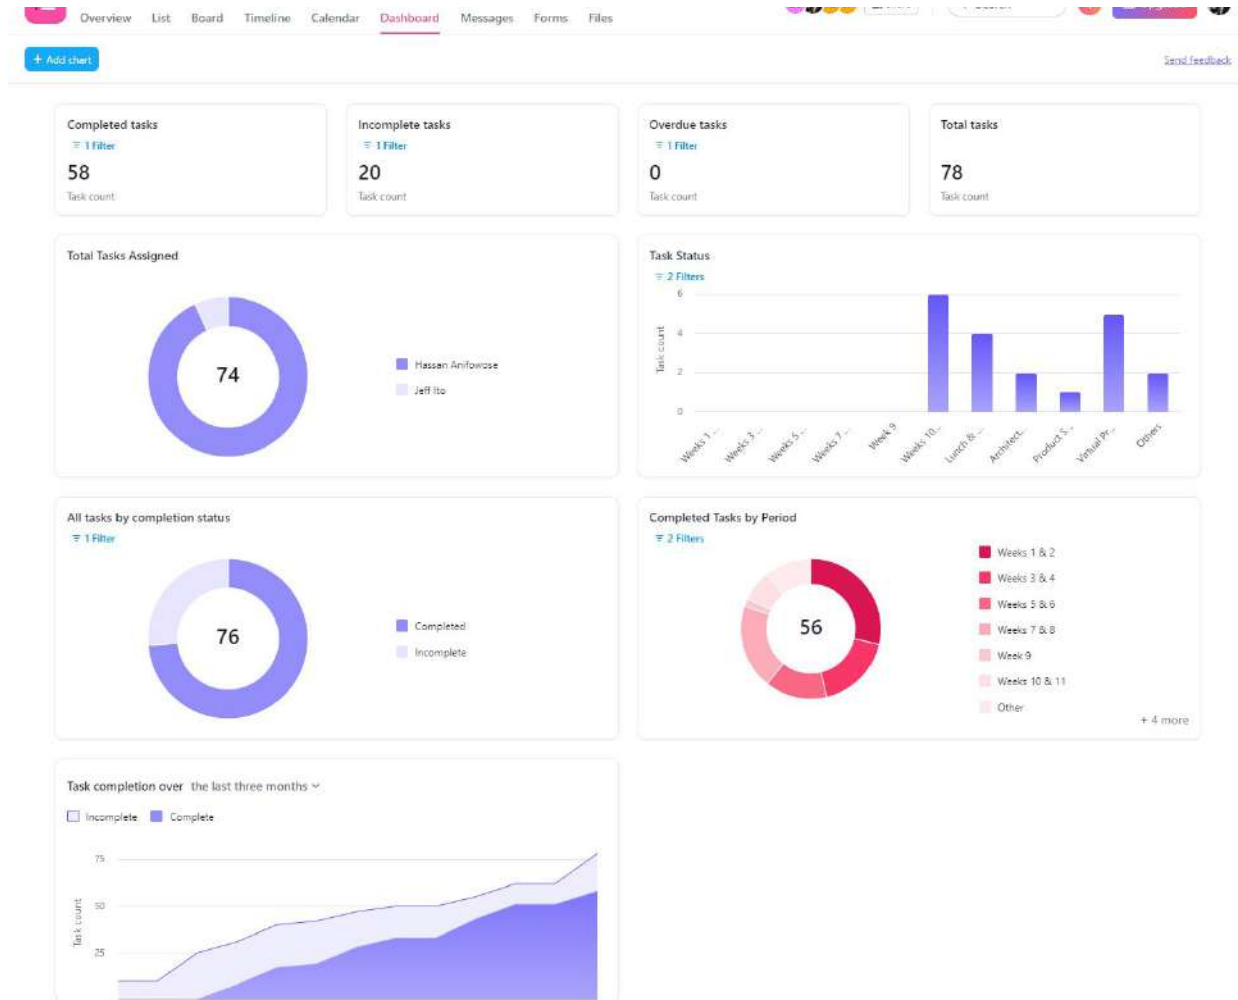

- Make informed decisions earlier
- Dominate your industry market - efficiency
- Sign on more projects easily - competition

If you can't measure it, you can't grow it.

Measuring efficiency has become part of the trend for maximum return on investment. You must establish the goals, develop the strategy and execute the ton of increasing workloads and scale.

To work smarter and faster? Or to work harder?

The choice is yours.

Getting Started

Suggested Resources for 'BIM adoption'

Autodesk Design Suite (Software - AutoCAD, Revit, MEP, Navisworks)

Autodesk University (Tons of educational resources on trends)

Blaze Academy (Podcasts, Trainings, BIM Strategy & execution)

BIM Africa (Pushing digital construction across Africa)
